Your perfect personalised pen, in just 5 working days.

Time matters.

Because sometimes the best ideas can't wait. You will receive from 500 to 5,000 pieces, up to 5 colour clip-print, in just 5 working days from artwork approval.

It catches the eye because it's good,
not because it's loud. The icon amongst
promotional writing instruments.
The original: timeless and unmistakable.

Basically, we had no other choice. When we started, we just had to offer you something that was really quite different than what you already knew. Or else our image and pens would have never amounted to much. The fact that something like a new icon among other promotional articles emerged, makes us, in retrospect, just

a little bit proud. Because the DS3, with its unmistakable form, has proven that a writing instrument made of plastic can convincingly convey quality. Its form has had a major influence on the design of promotional writing instruments as no other has had.

Black available only
for polished surface

When it's about having that little extra something, then this is the right one: more colours, more surfaces, more personalisation, more printing surfaces. All that, plus a design honoured with prestigious awards.

How would you like to personalise your writing instrument? With colours, logos, pictures, words, photos or illustrations? With printing in six colours, a combination of prints with up to five positions? Or with an image inlay printed in high-quality four-colour process? More colours, more surfaces, more personalisation, more printing surfaces. All that, plus a design honoured with prestigious awards.

If you look at the DS5 carefully from behind, you will discover, reflected within its form, the number that gave it its name: 5. This pen keeps its promise, making it an ideal personalisable communication medium.

Black available only for matt surface

The icon of a classic writing instrument.
A timeless interpretation of the triangular
form in an ergonomically optimised design.
Functional right down to the last detail.
Relaxed writing with a self-confident, high-
quality ballpoint pen.

Clear-cut design and sophisticated details make the DS8 a classic pen amongst writing instruments. The combination of different surfaces provides the DS8's design with its high-quality look. The clip and push button share the same colour but are transparent, irrespective of the selected casing surface. The clip and push button are only offered in the same surface and colour for white/black polished models.

Its form varies from the roundness of the tip to the oval-shaped push button. The large printing surface on the clip, vivid colour range and high-quality Mix & Match options provide lots of opportunity for creative individualisation.

The consciously added highlights catch the eye. Viewing the DS9 from different angles is an exciting experience. The rounded end gradually evolves into the oval shape of the push button, while its surfaces are mixed – with matt body and polished clip and button. The asymmetric connection between the clip and the body surface creates a tension with the otherwise minimalist use of form. The ring on the push button

gives the DS9 an indisputably striking look. The ring is available for matt body surface colours, the ring itself always full-colour polished or transparent. 20 standard colours are available. Combinations with options such as the satin finish metal tip allow you to design a pen that perfectly complements your brand or advertises your product.
